List of Figures

1	Sample image for the viewer and build pipeline	2
2	Wide figure example	4

List of Tables

1	Evaluation metrics	3
2	Wide table example	3

1 Overview

This document exercises editor features, indexing, build, and SyncTeX. TODO: revisit the summary section and validate TEX64_SEARCH_TOKEN coverage. We cite [2, 3] and refer to Section 3. Inline math: $E = mc^2$.

2 Introduction

This section provides context and references Figure 1.

TODO: confirm citations for TEX64_SEARCH_TOKEN.

2.1 Background

We use [1] for baseline notes and refer to Section 3 for the workflow.

Figure 1: Sample image for the viewer and build pipeline

3 Methods

We reference Table 1 and Section 2.

3.1 Model

The key equation is

$$F = ma \tag{1}$$

3.2 Optimization

$$a = b + c \tag{2}$$

$$d = e - f \tag{3}$$

Notes **TODO:** Verify the loss function on `TEX64_SEARCH_TOKEN`.

4 Results

We summarize metrics and reference Figure 2.

Metric	Train	Test
Accuracy	0.98	0.95
Loss	0.02	0.05

Table 1: Evaluation metrics

Run	A	B	C
R1	1	2	3
R2	4	5	6

Table 2: Wide table example

5 Blocks Playground

Inline math: $a^2 + b^2 = c^2$ and $\int_0^1 x^2 dx$. Display math:

$$\sum_{k=1}^n k = \frac{n(n+1)}{2}$$

$$e^{i\pi} + 1 = 0$$

$$x + y = z \tag{4}$$

$$f(x) = x^2 + 1 \tag{5}$$

$$= (x + 1)(x - 1) + 2 \tag{6}$$

$$g(x) = \begin{cases} 0 & x < 0 \\ 1 & x \geq 0 \end{cases} \tag{7}$$

$$A = \begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix} \tag{8}$$

`$This is verbatim and should not be detected as math.$`

6 Discussion

We refer to Equation 3 and Table 1.

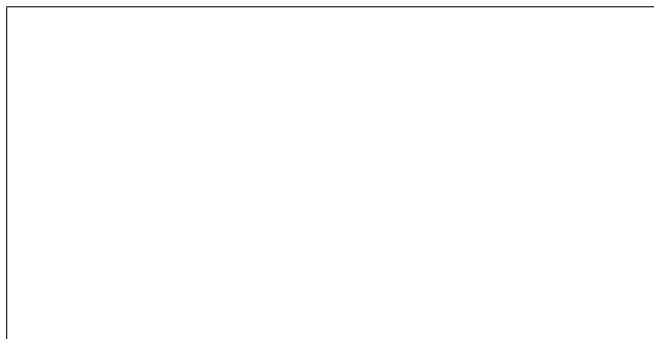

Figure 2: Wide figure example

A Appendix: Additional Checks

This section includes deeper outline levels for testing.

A.1 Extra Notes

We repeat `TEX64_SEARCH_TOKEN` to test search results.

A.1.1 Detail Block

Short supporting text for the outline index.

Paragraph Level Paragraph content with a quick TODO: confirm the glossary.

Subparagraph Level Subparagraph content with a reference to Section 5.
